PRODUCT SHEET · CHANDELIER

Koufonisia Chandelier

Curved iron arms, frosted globes above the table

The Koufonisia extends curved iron arms from a central stem, each ending in a frosted glass globe. The symmetry is deliberate: equal arms, equal globes, equal light. Frosted glass turns each E27 bulb into an ambient wash rather than a glare point. Available in 5 or 6 heads for different room widths, beige finish, sloped-ceiling compatible.

SPECIFICATIONS · SHARED
