Pique Pendant Light

Stone that glows like a captured moon

The Pique holds a carved alabaster sphere on a brass chain, and when the bulb comes on, the stone takes over — absorbing the source and releasing it as a soft, warm glow. No harshness, no glare. Natural veining shifts subtly as daylight changes around it. A pendant you notice most when it's off, and remember when it's on.

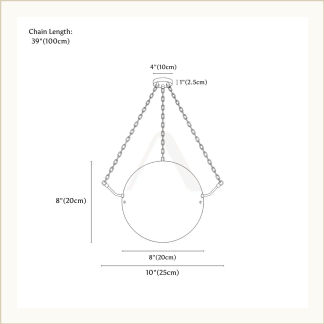

SPECIFICATIONS · SHARED

MATERIAL	Metal, Alabaster Marble
FINISH	Brass, Bronze
LIGHT SOURCE	LED (replaceable, included)
