Bieville Ceiling Light

Stone that glows, not a bulb you see

The Bieville holds a single G9 LED inside a shell of natural alabaster marble, so the glow passes through the stone rather than spilling out from a bare bulb. Each cube or globe carries its own veining — a copper base anchors it to the ceiling. The result is ambient light that feels like it belongs to the room, not imposed on it.

SPECIFICATIONS · SHARED

MATERIAL	Copper, alabaster marble
FINISH	Brass
LIGHT SOURCE	LED G9 (replaceable, included)
BULBS	1
WATTAGE	5W (500 lm)
SHAPES	Round D12 cm x H14 cm · Square L12 cm x H14 cm
