PRODUCT SHEET · WALL LAMP

Bretteville Wall Lamp

Triangular glass, copper base, prismatic glints

The Bretteville mounts a triangular glass tube against the wall on a circular copper base, and the geometry does the rest: angled faces catch the integrated LED and scatter it in subtle prismatic glints across the surrounding wall. The brass finish on the copper base grounds the composition while the clear glass amplifies it. 12W integrated LED, no bulb to replace.

SPECIFICATIONS

MATERIAL	Copper, Glass
FINISH	Brass
LIGHT SOURCE	Integrated LED
WATTAGE	12W (1320 lm)
DIMENSIONS	L22.8" (58 cm) x H4.7" (12 cm)
WEIGHT	1.7 kg
VOLTAGE	90–260V
INSTALLATION	Wall mount (hardware included)
DIMMABLE	On request

EMITTING COLOR

WARM WHITE (3000K)

KEY FEATURES

- Triangular glass tube scatters prismatic light across adjacent walls
- Circular copper base in a brass finish — warm anchor for the form
- Integrated LED — 1320 lm, no bulb changes needed
- Works as accent and ambient lighting simultaneously
- Suits living rooms, bedrooms, hallways, and bathrooms
