Ceze Wall Lamp

Travertine disc, walnut edge, warm from behind

The Ceze places a circular disc of yellow travertine against the wall, then lights it from behind. The stone's natural pitting and veining — the texture that gives travertine its character — becomes visible only when the LED activates. A walnut-finished wood accent rings the disc, adding a second material without complicating the form. One size, one clean circle.

SPECIFICATIONS

MATERIAL	Wood, Travertine
FINISH	Wood, Beige
DIMENSIONS	D9.9" (25cm)
