PRODUCT SHEET · PENDANT LIGHT

Humilis Pendant Light

One glass ball, warm all round

The Humilis keeps things simple: a glass sphere, a slim metal fitting, a warm point of light. The ball diffuses the integrated LED in every direction — none of the hard shadow lines you get from a shade. In brass or black, hung singly or paired, it works over a bedside table, a desk, or wherever a small, considered light is needed.

SPECIFICATIONS · SHARED
