Kalymnos Chandelier

Frosted globes curved around open iron

The Kalymnos Chandelier spreads iron arms in a balanced radial form, each one ending in a frosted glass globe with a crystal accent at the base. The frosted glass does two things at once — it diffuses the G9 LED into a soft, even wash and reads as an object worth looking at when unlit. Choose 6, 8, 12, or 16 heads to scale it to the ceiling; black or gold finish to suit the room.
